Subject Meeting Schedule

History:

 This message has been replied to.

Ben,

I would like to reschedule our meeting to discuss DBOC disturbances in Drakes Estero. I am happy to meet with you, but we have recently received new information regarding the oyster boat disturbances. I believe the issues involving the disputed NPS harbor seal disturbance data need to be resolved before we discuss how to move forward with analyzing those data.

Thank you,

Kevin

Subject Re: Meeting Schedule 

Hi Kevin,

I think we should still meet on Wednesday. Our meeting was not to discuss disturbances or how to analyze them. Rather, the meeting was to think about new ideas for measures of mariculture activity that you feel might be more appropriate than the annual DFG harvest metric.

So, please consider coming out. The meeting can be as short or long as you like, but I think it is important to move forward and discuss your perspective on these data sets and ways to potentially improve them.

You can let me know by email or leave me a message at 415-464-5247.

Thanks,

-Ben

Subject Meet and Comments on Becker 2010?

Hi Kevin,

I'm writing for two reasons. First, I wanted to see if you still wanted to meet to discuss better methods for assessing annual mariculture effort (both past and future) than "annual oyster harvest"?

Second, I welcome your feedback on the Becker 2010 report, especially concerning recommendations for better measures of mariculture effort?

Thanks,

-Ben
