

## Small Group Instructions

February 4, 2004

- Join your assigned group in the designated break out room
- Determine who will be the reporter for the group
- Discuss the following question for 45 minutes:

*What would be the most useful and important elements of a synthesis of current knowledge about marine mammals and anthropogenic sound?*

- Consensus is not the goal; develop report of the range of ideas and record it on an overhead slide.
- Return to the plenary for report out.
